

University of Rostock

Master of Science in Physics

The University of Rostock, Department of Physics, offers a Master of Science program in Physics for Students who have obtained a Bachelor's Degree in Physics. Physics Research in Rostock covers a wide spectrum in experimental, applied and theoretical physics:

Elementary Particle Physics and Astrophysics

Physics of Molecules, Cluster and Surfaces

Optics and Laser Physics

New Materials, Nanoscale Materials and Polymer Physics

Semiconductor Physics and Solid State Theory

Quantum Theory and Statistical Physics

Physics of the Atmosphere and the Ocean

The Master of Science program in Physics will take two years including a Master thesis within one of the above research fields. The courses will be taught in English.
